SUMMARY

I've been immersed in the Unity game engine since 2013. For over 5 years, I've worked professionally as a game developer, gaining extensive experience with C# and Unity. I'm passionate about all aspects of game development, and I excel in the mobile gaming space, possessing comprehensive knowledge of the entire development lifecycle, from concept to release.

EXPERIENCE

Unity Developer

Joygame

05/2022 - 02/2025 İzmir, Turkey

- Developed a 3D game using Unity 3D for iOS and Android platforms.
- Optimized game play and graphics performance for mobile devices.
- Tested and debugged game code for potential bugs and errors.
- Provided technical guidance and mentorship to junior game developers.
- Collaborated with game designers and artists to create innovative experiences.
- Developed games that have received 1m, 1m and over 5m downloads.
- Part in optimizing the games

Unity Developer

BoomBit

08/2021 - 2022 Ankara, Turkey

- Under the supervision of programming leads, I wrote and developed application-specific code based on design requirements, as well as incorporated new game features or functionality.
- Developed a 3D game using Unity 3D for iOS and Android platforms.
- Initiated a cross-functional workflow with the art team to streamline asset integration, improving deployment speed by 25%.
- Optimized game play and graphics performance for mobile devices.
- Implemented game features using C# and the Unity engine.

Unity Developer

Freelancer

09/2018 - 12/2021 Ankara, Turkey

- I wrote and developed application-specific code based on design requirements, as well as incorporated new game features or functionality.
- I built game prototypes and project schedules with reliable timetables.
